A friendly reminder from your Nursing Department...

It is important that all medications for HealthCare Center residents have a doctor's order, to include common over the counter medications like Aleve or Aspirin for example. For safety purposes Healthcare Care resident are not able to keep medications in their room for any reason, unless it has been determined by the Interdisciplinary Care Team that the resident is able to self-administer medications. At which time the medications will be kept in the appropriate storage. It is Nursing's responsibility to monitor medications to ensure there are no drug interactions and that all medications are taken appropriately.

Thank you, Your Nursing Team
